U-POL Primers & Clears Introduction

Urethane Primers are activated undercoats that are applied to a surface that has been prepared, cleaned and sanded prior to paint application. They provide corrosion protection and enable the paint to “stick”

Urethane Clears are activated top coats that go over the top of base coat paints. They make paint shine, provide protection from the sun, UV rays and the elements that cause paint to fade.

Hardeners come in different speeds based on temperature and create a chemical cross link in the primer / clear so it will bond to the surface of the car.

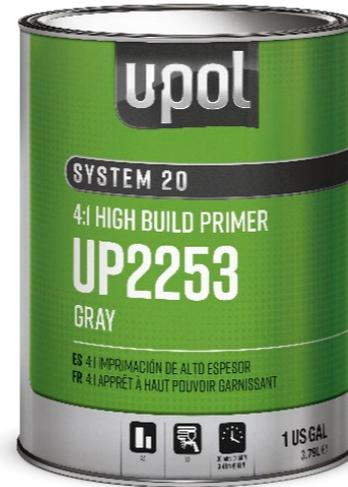

2K Clearcoats and Primers: Simple System with Less SKUs

U-POL NR Primers & Clears Range

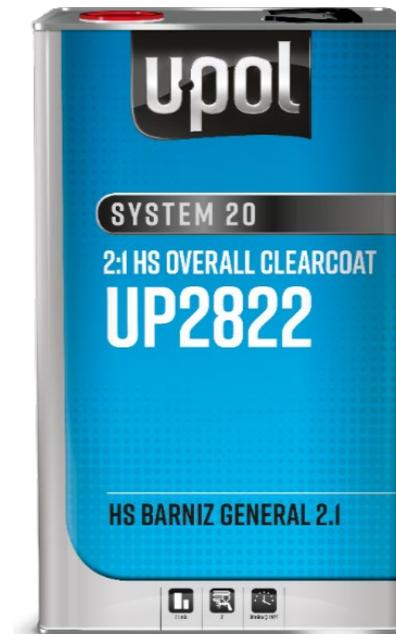

National Rule 4:1 and 2:1 Product Offering

4:1
DTM Primer
UP2253

4:1
Production Clear
UP2882

2:1
Production Clear
UP2802
Over All Clear
UP2822

Hardeners
UP2303 Fast
UP2323 Std
UP2333 Slow
UP2333XS

U-POL VOC Primers & Clears Range

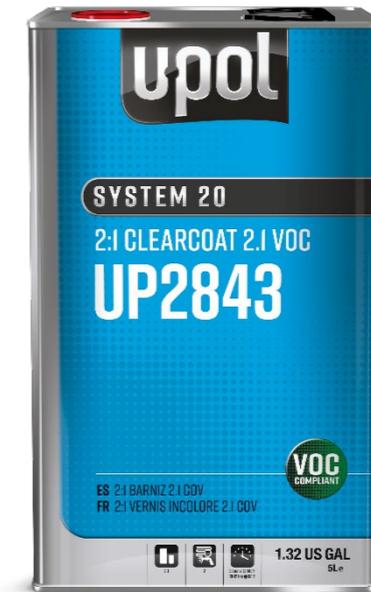

2.1 VOC 4:1 and 2:1 Product Offering

4:1
DTM Primer
UP2253V

4:1
Production Clear
UP2872V

2:1
Over All Clear
UP2843

Hardeners
UP2381 Fast
UP2391 Std
UP2371 Slow

U-POL NR and VOC Hardener Temp Range

National Rule temperature range

Temp F	50	60	70	80	90	100 +
Hardener						
2303		Red	Red	Red		
2323			Red	Red	Red	
2333			Red	Red	Red	Red
2333XS						Red

VOC temperature range

Temp F	50	60	70	80	90	100 +
Hardener						
2381		Red	Red	Red		
2391			Red	Red	Red	
2371			Red	Red	Red	Red

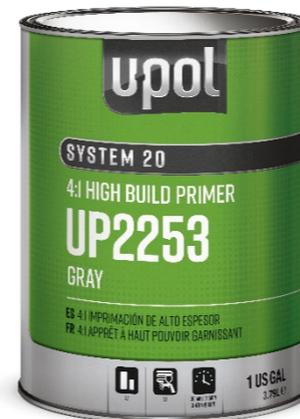

U-POL Primers & Clears Coating Advantages

Advantage of U-POL System 20
offering

Simplicity

One hardener
Multiple Products

U-POL 4:1 Direct to Metal Multi-Function Primer

2253 National Rule

2253V 2.1 VOC

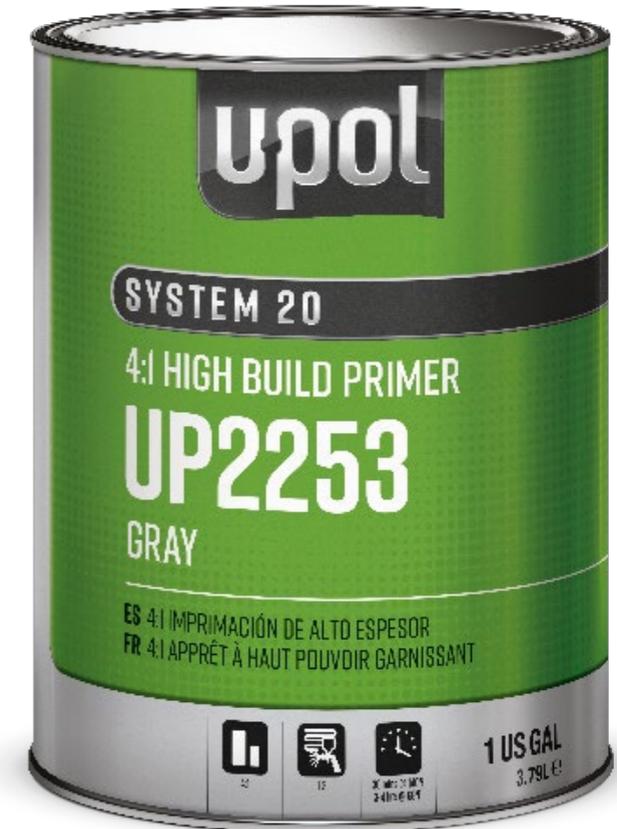

A unique Direct To Metal multi-function, multi-mix ratio primer:

4:1 as a high build primer,

4:1:1 as a primer surfacer

4:1:2 as a sealer

- 78% solids
- Additional substrates: E-Coat, SMC, Body Fillers, properly prepared aluminum*, galvanized*
- Hardeners for any environment
- Available in gray, black and white

U-POL 4:1 Clear Coat Features

2882 National Rule 2872V 2.1 VOC

- Great performance / Great value
- European resins / European quality
- Outstanding gloss and DOI
- Superior UV resistant
- Excellent flow
- Non-sag properties
- Universal application
- Air dry or low bake (130F – 140F)
- Multiple Hardeners for any shop condition

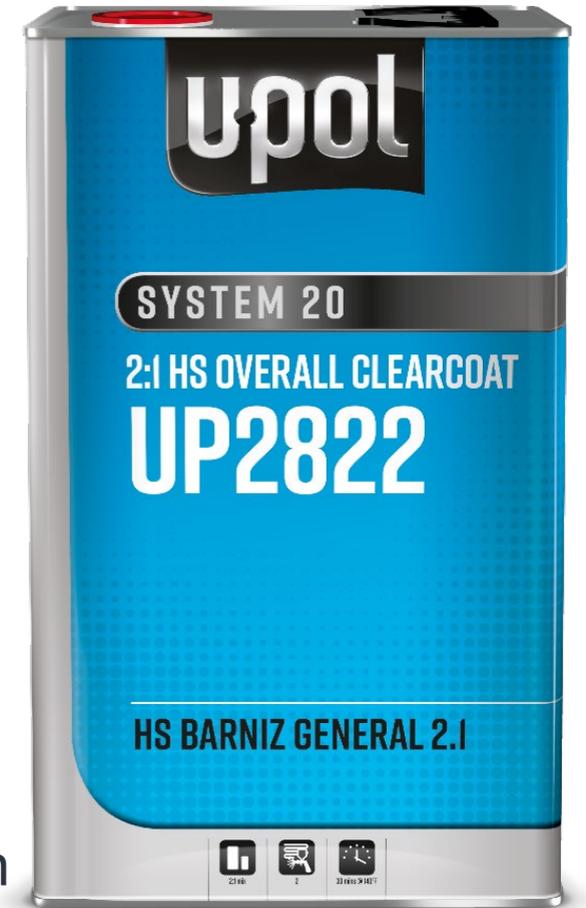

U-POL 2:1 Clear Coat Features

2802 National Rule Glamour
2822 National Rule Overall
2843 2.1 VOC Overall

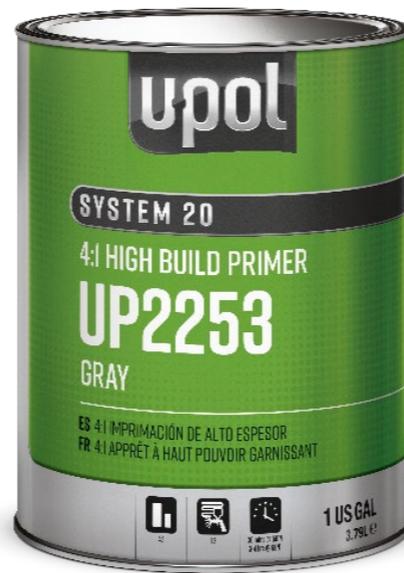

- High Solids
- European resins and quality
- Crystal clear gloss and DOI
- UV resistant finish
- Excellent flow
- Non-sag properties
- Universal application
- Air dry or low bake (130F – 140F)
- 4 Hardeners for any shop condition

U-POL 4:1 Primer & Clear Application

Fantastic Start
and a
Perfect Finish

+

+

U-POL 4:1 Primer and Clear Application

Hood repair - continuation

For any 2K painting projects U-POL strongly recommends the use of P.P.E consisting of:

- Gloves
- Safety glasses
- Paint Suit
- Respirator suitable for paint application

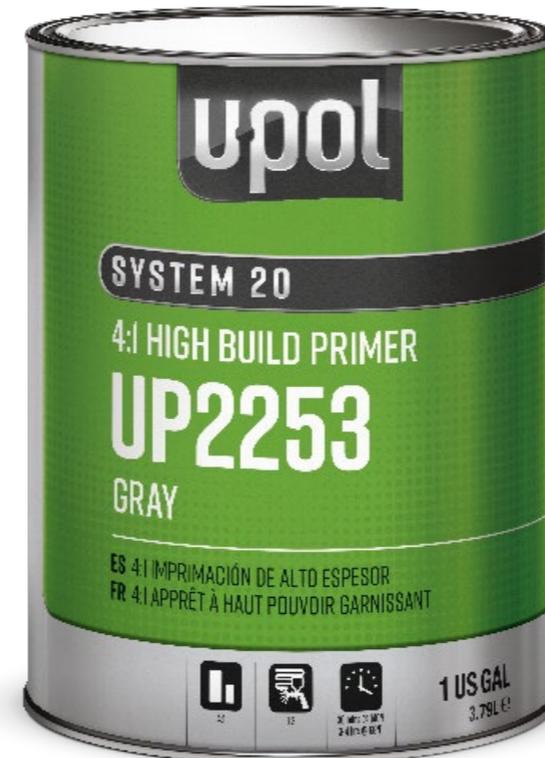

System 20 Primers and Clears Summary

DRIVING SURFACE PERFECTION

- 1) Direct To Metal
- 2) Multi-Function
- 3) 78% Solids
- 4) Easy sanding
- 5) Multiple hardeners
- 6) Can be tinted

- 1) NR and VOC offering
- 2) European quality
- 3) High solids
- 4) UV stable, long life
- 5) Air Dry or bake
- 6) Easy to polish
