## TECHNICAL DATASHEET

TIGERSEAL is a one component polyurethane sealant and adhesive that is ideal for a number of automotive applications. It will permanently seal and stick body panels and trim, as well as seal around windows, doors, lights and many more. It will stick to most materials such as steel, aluminium, glass and most plastics.

- Ready for use 1K formula.
- Completely and permanently seals and bonds body panels, trim and seams.
- Use to seal around windows, doors and lights and more.
- Use a standard caulking gun with the cartridge.
- Moisture-cured formula can be tooled and overcoated immediately.
- Resistant to temperatures from -40°C to +90°C (up to +120°C for short intervals).

The materials to be bonded should be pressed applications may need to be fixed mechanically	15 – 35 °C 20 minutes gun or pneumatic version at approximately 108 PSI (6 bar). essed firmly or mechanically fixed together within the skin formation time. Some nically until complete cure is obtained.		
Drying Time PLEASE NOTE: drying times are dependent u   The drying times suggested are based on 50%   Skin Formation at 20°C   Through-Cure at 20°C			
The drying time for synthetic paints may be exit This formulation does not contain biocides or h	This formulation can be directly overcoated immediately after application with most water/solvent-based paint systems. The drying time for synthetic paints may be extended. This formulation does not contain biocides or have UV protection. If used in areas with prolonged exposure to sunlight or high moisture, it is recommended to overcoat with a suitable paint system.		
Additional information Important Remarks	Once opened, exposure to air will initiate curing of the remaining adhesive in the cartridge. Ensure the full cartridge is used within 3 days. Once opened, securely apply aluminium foil to both the tip and base of the cartridge to maximize the longevity of the adhesive. Uncured adhesive can be removed with a panel wipe. Cured adhesive can only be removed mechanically.
